ABOUT ME

Technical Support Engineer with 2+ years of experience in SaaS products, working closely with users and development teams to analyze requirements, identify issues, and improve product workflows. Skilled in translating user needs into actionable insights and supporting product improvements. Currently transitioning into Product Management with a focus on user experience and data-driven decision-making.

WORK EXPERIENCE

2024-APRIL 2026 TECH SUPPORT ENGINEER (EXECUTIVE TECH SUPPORT)

BD Funnel Builder

- Analyzed user requirements and translated user problems into actionable insights to support product improvements
- Collaborated with developers to resolve bugs and improve product workflows, usability, and system performance
- Monitored support tickets, tracked issue status, and ensured timely resolution through structured follow-up
- Performed manual testing to validate fixes and ensure system functionality before and after updates
- Guided users on product usage, troubleshooting, and best practices for effective system utilization
- Analyzed user behavior and prepared reports on recurring issues to support product enhancements
- Contributed to documentation and knowledge base while using AI tools (ChatGPT, Gemini) for troubleshooting, requirement analysis, and documentation
- Assisted in understanding feature requirements and aligning them with user needs during development
- Assisted in clarifying feature requirements and supporting alignment between user needs and development output

2024-2024 BUSINESS DEVELOPMENT EXECUTIVE

Datascape IT Limited

- Gathered client requirements and translated business needs into software solutions
- Conducted product demos and onboarding sessions
- Coordinated with internal teams to ensure smooth implementation
- Collected user feedback and identified potential product improvements
- Assisted in structuring client requirements into clear and actionable formats for internal teams

2023-2024 JUNIOR TECHNICAL SUPPORT EXECUTIVE

M 360 ICT

- Worked closely with 1500+ travel agency users, gathering continuous feedback on product workflows.
- Identified system bottlenecks and contributed to workflow improvementsAssisted product and QA teams by reproducing bugs and validating fixes.
- Helped improve internal user guides and documentation based on real customer usage.
- Provided insights for product enhancements based on market and customer behavior analysis.
